

WheelHouse

LOCATION

Vedra Beach, FL

SIZE

31,455 (Building A)

15,700 (Building B)

WALL SYSTEM

Insulated Metal Panel

ROOF SYSTEM

Standing Seam 360

BUILDING END-USE

Automotive Storage

WheelHouse is a dynamic community built around storing and enjoying automotive, boating and recreational vehicle assets. From exotic and luxury cars, classic muscle cars, luxury coaches, motor yacht/cruisers, and everything in between, this facility is functional, secure and first class. Featuring customizable storage units, the community center environment provides owners the opportunity to gather with friends, family and fellow owners in their garages, as well as the fully-equipped, exclusive owners' club room.

This unique project was designed to make a custom metal building look less like a metal building, and more architecturally appealing by alternating panel directions, making custom color selections and, for security, utilizing CMU for the rear walls. The PEMB and CMU on this project has gained the attention of the Florida First Coast Associated Builders & Contractors (ABC) and the project has been selected as top in its category for its unique use.
