

## Project Spotlight

AUGUST 2024

### Tennessee Tractor

**Builder: D.C. Construction & Trucking**

This tractor and equipment service & repair facility for Tennessee Tractor, an authorized John Deere dealer, is a three-building project encompassing 54,828 sf of agricultural sales and service space for farm equipment. Located in Alamo, TN and built by Kirby Authorized Builder, D.C. Construction & Trucking, the custom metal building features a multi-level office with a double-connected mezzanine that expands the interior workspace by 7,600 sf.

Attached to the office and spanning the front of the building is an open lean-to canopy. Along both sides of the office space are 10' canopies that connect to 20' canopies running the length of both side of the shop.

In the shop, a 5-ton and (2) 10-ton cranes are located on the same runway and bay. Various-sized framed openings are placed throughout the structure to accommodate 11 overhead doors.

Kirby's Standing Seam 360 roof system in galvalume plus, as well as the R-Panel wall panels in fox gray were utilized. The lean-to ceiling is fully lined and complete with Kirby's Loc Seam roof panels in slate gray.
